## Q&A

### Q: What is the difference between the body butter and the lotion?

A: Body butters and body lotions are both moisturizers. Body lotion tends to have a higher water content and more liquid consistency, while the body butter is usually thicker and creamier. As such, body butter is ideal for those with dry and very dry skin.

### Q: Can I use this product on my face?

A: While SeacretSofteningBody Lotion works super well in moisturizing skin, we wouldn't recommend applying any body formulas on the face as facial skin is much thinner and has different needs.
